Ibrahim Aldarmaki

✉ ibrahim.m.aldarmaki@outlook.com

EDUCATION

Carnegie Mellon University   August 2025 – Present
Masters (by research)   Research Interests: Machine Learning, Deep Learning   *Pittsburgh, USA*

The University of Edinburgh   Sep 2020 – May 2023
BEng (Hons.) in Electronics and Electrical Engineering   First Class Honours   *Edinburgh, UK*

EXPERIENCE

Research Associate   April 2025 – July 2025
Mohammed Bin Zayed University of Artificial Intelligence   *Abu Dhabi, UAE*
- Worked on causal inference and causal representation learning to uncover underlying concepts and causal models from high-dimensional data.
- Investigated the OpenReview rebuttal system and uncovered latent causal mechanisms that directly influence rebuttal-driven score changes in the peer-review process.

Research Associate   Sep 2024 – April 2025
Khalifa University   *Abu Dhabi, UAE*
- Conducted research on Wi-Fi sensing for healthcare applications, with a focus on signal processing and machine learning techniques to enhance sensing accuracy and reliability.
- Developed software designs and solutions for real-time human motion detection through Wi-Fi signals using off-the-shelf hardware.

Research Associate   Dec 2023 – April 2024
Mohammed Bin Zayed University of Artificial Intelligence   *Abu Dhabi, UAE*
- Worked on deep neural networks for Multichannel Speech Enhancement and developed a novel, parameter-efficient neural architecture.
- Investigating generative and predictive code-switching models, utilizing pre-trained Language Models (LMs) to advance multilingual code-switching prediction and generation.

Teaching Assistant   Sep 2022 – May 2023
The University of Edinburgh   *Edinburgh, UK*
- Served as a teaching assistant for the third-year digital systems design course (ELEE09035), guiding students in developing complex synchronous digital systems and realizing finite-state machines from high-level functional specifications and prototyping them on FPGA hardware using Verilog HDL.
- Facilitated the learning process in the second-year digital systems design course (ELEE08015) in analyzing and designing combinational and sequential gate-level circuits.

Space Science Researcher   Jun 2022 – Aug 2022
Mohammed Bin Rashid Space Centre   *Dubai, UAE*
- Studied the Martian surface diurnal temperature and characterized its thermophysical properties using observed diurnal temperatures taken by Emirates Mars Mission's (EMM) Emirates Mars Infrared Spectrometer (EMIRS) instrument.
- Developed thermophysical properties estimation algorithms that surpassed current industry standards in accuracy and efficiency.
